REACH EC1907/2022 Statement

Under the REACH Regulation, the products that Datum Alloys Ltd supplies your company are defined as “Articles”.

The Regulation requires “all substances that are intended to be released from articles during normal and reasonably foreseeable conditions of use to be registered according to the normal rules, including tonnage deadlines and information requirements, if those substances are present in the articles above 1 tonne per year”.

Substances in our products are not intended for release and as such do not require registration under the REACH regulations. Also they contain no substances of very high concern (SVHC’s) which are intended for release and therefore do not require notifying to the agency.
